

Mini-Inline
Custom Windows

EASI-SERV PRODUCTS INC.

Easi-Serv Mini-Inline

Easi-Serv's smallest profile drive up window is available in almost any little size.

The one and three quarter inch perimeter framing and one inch door bar gives the maximum viewing area in a service window.

Spring loaded handles lock the window automatically every time the window is closed, providing employee safety.

The counter-balanced moving panel is virtually weightless and uses high quality delrin-nylon pulleys for quiet trouble-free operation. These are the same pulleys used in racing yachts for rust proof long life and high working loads.

The Mini-Inline is available in clear and bronze anodized finishes. Other colours are available with wet coat or powder paint finishes.

Easi-Serv Products Custom Windows

Easi-Serv Products can custom design your window to suit your needs. Vertical lift or side sliding, automatic or manual. We specialize in custom windows using our years of experience to make your window durable and trouble free.
